## VIVO OS 4.07

for VIVO and COMBO J7

### Additional features compared to the previous version

- New Rotary Effect (for S1, S3, S7, SX7, P3, P7, H1, H3, H7)

*Already introduced on J7 and S9 with previous OS 4.06, this effect is our latest generation of Rotary Speaker effect conceived with a new algorithm that makes the entire depth and the simulation of the horn and bass speakers rotations even more truthful. Accelerations and decelerations are so accurate that you have the perception to virtually see the moving speakers adding this essential character to your organ performances.*

- NEW Internal Speaker Equalization (only for H7)

*Dexibell is pleased to release “Acoustic Timbre Shaping”, a newly developed equalization specifically for the VIVO H7 piano that better expresses the new Italian Grand Piano tone as well as all the new “Platinum” tones now available as Free Downloadable sounds.*

*We kindly suggest you upgrade your VIVO H7 instrument to fully enjoy the beauty of these superb sounds through its on-board speakers by using the new “Acoustic Timbre Shaping” EQ.*

- NEW parameter has been added in “Four Hands” mode in order to select a specific sound (only for H1, H3, H7)
- Compatibility for new Classic Organ Type (English-Romantic, French-Symphonic, American-Classic, Positive) downloadable for free at [dexibell.com](http://dexibell.com) (only for J7, S9)
- Several bugs adjustment (for all VIVO and J7 models)
